Vietnam Electricity Construction Joint Stock Corporation
VNECO4 ELECTRICAL CONSTRUCTION JOINT STOCK COMPANY

No. 24/CV-VNECO4

(Regarding the Explanation of the variance in profit after tax and revenue in Q4/2024 compared to Q4/2023, and profit after tax in 2024 compared to 2023.)

To: - The State Securities Commission;
 - The Hanoi Stock Exchange.

THE SOCIALIST REPUBLIC OF VIETNAM
 Independence - Freedom - Happiness

Vinh City, January 18, 2025

First, the VNECO4 Electrical Construction Joint Stock Company ("the Company") - Stock Code: "VE4" would like to extend its respectful greetings to the Hanoi Stock Exchange. Pursuant to Circular No. 96/2020/TT-BTC dated November 16, 2020, issued by the Ministry of Finance, providing guidance on information disclosure in the securities market, VNECO4 Electrical Construction Joint Stock Company hereby provides an explanation regarding the changes in profit after tax in the Q4/2024 income statement, which varied by 10% or more compared to the same period in Q4/2023. Furthermore, the profit after tax for the full year of 2024 shifted from a loss to a profit compared to 2023. The details are as follows:

Accounting Period	Total Revenue	Total Expenses	Profit Before Tax	Profit After Tax
Q4/2024	26,672,755,235	26,643,052,756	29,702,479	-139,839,125
Q3/2024	52,837,795,961	55,653,038,249	-2,815,242,288	-2,815,242,288
Variance	-26,165,040,726	-29,009,985,493	2,844,944,767	2,675,403,163
Percentage variance (%)	-49.52%	-52.13%	-101.06%	-95.03%
Year 2024	73,580,325,112	67,699,755,679	673,804,033	504,262,429
Year 2023	93,291,161,177	90,605,967,681	-3,775,132,885	-3,919,399,180
Variance	-19,710,836,065	-22,906,212,002	4,448,936,918	4,423,661,609
Percentage variance (%)	-21.13%	-25.28%	-117.85%	-112.87%

The total accounting profit after tax for Q4/2024 saw a 95.03% reduction in losses (VND 2,675 million) compared to Q4/2023. This was due to a 52.13% (VND 29,010 million) decrease in total operating expenses, while total revenue and other income experienced a comparatively lower decline of 49.52% (VND 26,165 million). The total revenue for Q4/2024 and the full year of 2024 decreased compared to the same periods in the previous year. The primary reason was that production volumes in 2024

primarily relied on labor, as the majority of materials had already been accounted for in the production output of 2023.

The reduction in total expenses was mainly driven by a decrease in provisions for investment securities devaluation and interest expenses. Cash flow was liquidated and optimized efficiently, while general administrative costs were reduced with the goal of generating profit for the company.

Additionally, at the request of the investor, several projects were completed within a short timeframe, minimizing risks and incidental costs while maximizing profits.

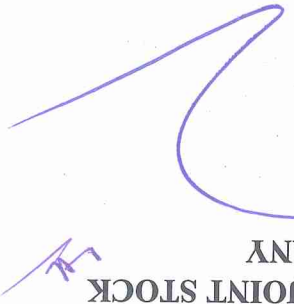

The above is the Company's explanation. We hereby confirm that the content accurately reflects the actual situation presented in the interim financial statements.

Best regards !

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these financial statements, are as follows:

3.1 Estimates

The preparation of financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires the Board of Directors to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the financial year. Although these accounting estimates are based on the Board of Directors' best knowledge, actual results may differ from those estimates.

3.2 Cash and Cash equivalents

Cash comprises cash on hand and demand deposits.

Cash equivalents are short-term investments that are highly liquid, convertible to cash, and have a low risk of value change.

3.3. Financial investments

Trading securities

Trading securities are securities held by the Company for trading purposes. Trading securities are recorded from the date the Company acquires ownership and are initially measured at fair value of the consideration paid at the time of transaction plus transaction costs associated with the purchase of trading securities.

In subsequent accounting periods, securities investments are determined at original cost minus trading securities discounts.

Provision for impairment of trading securities is made in accordance with current accounting regulations.

Held-to-maturity investments

Held-to-maturity investments include term deposits with the purpose of earning periodic interest and other held-to-maturity investments.

Held-to-maturity (HTM) investments are recorded at cost on the acquisition date, including any transaction costs. Interest income from investments held to maturity is recognized in the income statement on an accrual basis

Provision for losses on investments is made in accordance with current accounting regulations.

3.4 Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

3.5 Inventories

Inventory recognition principles: Inventories are recorded at original cost minus provisions for price reduction, obsolescence, and deterioration.

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition.

Cost is calculated using the weighted average method.
Inventory accounting: Perpetual method.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date.

3.6 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

Fixed assets formed by construction investment under the contracting method, the original price is the final settlement price of the construction investment project, other directly related costs and registration fee (if any).

Fixed assets are houses and structures attached to land use rights, the value of land use rights is determined separately and recorded as intangible fixed assets.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

Years	
8 - 40	Buildings and structures
5 - 12	Machinery and equipment
3 - 5	Office equipment
6 - 10	Means of transportation
3 - 5	Others

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between profit from sales or disposals of assets and their residual values and is recognised in the Income Statement.

3.7

Construction in progress

Properties in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost. Cost includes costs that are necessary to form the assets in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

3.8

Prepayments

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods, including:

Tools and instruments

Tools and equipment put into use are allocated to expenses using the straight-line method with within 3 years.

Other prepaid expenses

Other prepaid expenses are total costs paid in advance for one-time that will be used over multiple accounting periods and allocated using the straight-line method (the allocation time depends on the characteristics and nature of the product).

3.9 Accounts Payable and Accrued Expenses

Liabilities and accruals are recognized for amounts to be paid in the future for goods and services received. Accruals are recognized based on reasonable estimates of the amounts to be paid.

Payables are classified as trade payables, accrued expenses, or other payables based on principle as:

- Trade payables reflect commercial payables arising from transactions of purchasing goods, services, assets and the seller is an independent entity from the Company.
- Payable expenses reflect the amounts payable for goods and services received from the seller but not yet paid due to insufficient documents, and amounts payable to employees for salaries, vacation (if any), and production expenses that must be deducted in advance.
- When such expenses actually arise, if there is a difference with the amount deducted, the accountant will record additional or reduce the cost corresponding to the difference.
- Other payables reflect non-commercial payables not related to purchase, sale or service provision transactions.

3.10 Provisions

Construction warranty reserve is calculated for each construction project with warranty commitment.

The warranty provision is set at a maximum of 5% of the construction and installation revenue requiring warranty. The provision rate is determined based on management's estimate of the expenditure required to satisfy the obligation at the balance sheet date.

When a construction warranty period expires, the unused warranty reserve is recorded in other income.

3.11 Revenue recognition

Revenue from the sale of goods and services are recognized when all of 5 following conditions are satisfied:

- (a) the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) the amount of revenue can be measured reliably;
- (d) it is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

The outcome of a construction contract can be estimated reliably, in the following two cases:

- (f) Construction contracts provide for payments to contractors according to planned progress: revenue and costs related to the contract are recognized in proportion to the stage of completion of the work as determined by the contractor at the end of the financial year.
- (g) Construction contract that stipulates that a contractor will be paid based on the value of the work performed: revenue and expenses related to the contract are recognized in proportion to the portion of work completed and confirmed by the customer during the period reflected on the issued invoice.

Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

3.12 Cost of goods sold and services

Cost of goods sold includes the cost of products, goods and services provided during the year and is recorded in accordance with revenue consumed during the year.

3.13 General and administration expenses

General and administration costs reflect actual costs incurred in the general management process of the Company, including salaries staff, social insurance, health insurance, union fees, unemployment insurance of management staff, office materials costs, depreciation costs, provision costs, outsourced services and other costs.

Borrowing costs are recognised in the Income Statement in the year when incurred.

3.14 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

3.15 Financial instruments

Initial recognition

Financial assets: At the date of initial recognition, financial assets are recognised at cost plus transaction costs that are directly attributable to the acquisition of the financial assets. Financial assets of the Company comprise cash and trade and other receivables.

Financial liabilities: At the date of initial recognition financial liabilities are recognised at cost plus transaction costs that are directly attributable to the issue of the financial liabilities. Financial liabilities of the Company comprise loans, trade and other payables and accrued expenses.

Subsequent measurement after initial recognition

Currently, there are no requirements for the subsequent measurement of the financial instruments after initial recognition.

4.3 Short-Term trade receivables

The Company has determined the fair value of the investments into VNECO and VNECO9 based on the listed price on the stock exchange and the number of shares held.
